

QCItemAnchor::~~QCItemAnchor

QCItemPosition::~~QCItem
Position

QCItemPosition::parentAnchorY

```
graph LR; A[QCItemAnchor::~~QCItemAnchor] --> C[QCItemPosition::parentAnchorY]; B[QCItemPosition::~~QCItemPosition] --> C;
```

The diagram illustrates a memory management or pointer relationship. On the left, there are two rectangular boxes representing destructors. The top box contains the text 'QCItemAnchor::~~QCItemAnchor'. The bottom box contains the text 'QCItemPosition::~~QCItemPosition', with 'Position' on a second line. On the right, there is a shaded rectangular box containing the text 'QCItemPosition::parentAnchorY'. Two blue arrows originate from the right side of the two destructor boxes and point towards the left side of the shaded box, indicating that both destructors interact with or access the 'parentAnchorY' variable.
