

QCustomPlot::mouseMoveEvent

QCustomPlot::mouseRelease  
Event

QCPSelectionRect::isActive

```
graph LR; A[QCustomPlot::mouseMoveEvent] --> C[QCPSelectionRect::isActive]; B[QCustomPlot::mouseReleaseEvent] --> C;
```

The diagram illustrates a relationship between two mouse event methods and a selection state. On the left, two white rectangular boxes with black borders contain the text 'QCustomPlot::mouseMoveEvent' and 'QCustomPlot::mouseReleaseEvent' respectively. On the right, a gray rectangular box with a black border contains the text 'QCPSelectionRect::isActive'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both mouse events trigger or interact with the 'isActive' state of the 'QCPSelectionRect' object.
