

QCPAbstractItem::deselect  
Event

QCPAbstractItem::selectEvent

QCPAbstractItem::setSelected

```
graph LR; A[QCPAbstractItem::deselectEvent] --> C[QCPAbstractItem::setSelected]; B[QCPAbstractItem::selectEvent] --> C;
```

The diagram illustrates a call relationship between three methods of the QCPAbstractItem class. On the left, two white rectangular boxes represent the calling methods: 'QCPAbstractItem::deselectEvent' (top) and 'QCPAbstractItem::selectEvent' (bottom). On the right, a gray rectangular box represents the target method: 'QCPAbstractItem::setSelected'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'deselectEvent' and 'selectEvent' invoke 'setSelected'.
