

QCPAxis::deselectEvent

```
graph LR; A[QCPAxis::deselectEvent] --> B[QCPAxis::setSelectedParts]; B --> C[QCPAxis::selectionChanged];
```

The diagram illustrates a sequence of three QCPAxis methods. It begins with a gray box labeled 'QCPAxis::deselectEvent'. A blue arrow points from this box to a white box labeled 'QCPAxis::setSelectedParts'. Another blue arrow points from the second box to a third white box labeled 'QCPAxis::selectionChanged'.

QCPAxis::setSelectedParts

QCPAxis::selectionChanged
