

QCPLayoutGrid::~~QCPLayoutGrid

QCPLayoutInset::~~QCPLayout
Inset

QCPLayout::clear

```
graph LR; A[QCPLayoutGrid::~~QCPLayoutGrid] --> C[QCPLayout::clear]; B[QCPLayoutInset::~~QCPLayout Inset] --> C;
```

The diagram illustrates a sequence of operations. On the left, two boxes represent destructor calls: 'QCPLayoutGrid::~~QCPLayoutGrid' (top) and 'QCPLayoutInset::~~QCPLayout Inset' (bottom). Two blue arrows originate from the right side of these boxes and point towards a single box on the right labeled 'QCPLayout::clear'. This suggests that both destructors trigger the 'clear' method of the 'QCPLayout' class.
