

QCPAxisRect::elements

QCPPolarAxisAngular
::elements

QCPLayout::elements

```
graph LR; A[QCPAxisRect::elements] --> C[QCPLayout::elements]; B[QCPPolarAxisAngular::elements] --> C;
```

The diagram illustrates the inheritance of elements from two parent classes to a child class. On the left, two boxes represent the parent classes: 'QCPAxisRect::elements' (top) and 'QCPPolarAxisAngular::elements' (bottom). On the right, a single box represents the child class: 'QCPLayout::elements'. Two blue arrows point from the parent boxes to the child box, indicating that the elements of both parent classes are inherited by the child class.
