

QCPPainter::setModes

```
graph LR; A[QCPPainter::setModes] --> B[QCPPainter::modes];
```

A diagram illustrating a function call. On the left, a gray rectangular box contains the text "QCPPainter::setModes". A blue arrow points from the right side of this box to the right side of a white rectangular box on the right. The white box contains the text "QCPPainter::modes". Both boxes have a thin black border.
