

QCPAxis::setTickLength

```
graph LR; A[QCPAxis::setTickLength] --> B[QCPAxis::setTickLengthIn]; A --> C[QCPAxis::setTickLengthOut];
```

The diagram illustrates a method branching in the QCP library. A central box on the left, labeled 'QCPAxis::setTickLength', has two blue arrows pointing to two separate boxes on the right. The top box is labeled 'QCPAxis::setTickLengthIn' and the bottom box is labeled 'QCPAxis::setTickLengthOut'. The central box has a gray background, while the two destination boxes have white backgrounds.

QCPAxis::setTickLengthIn

QCPAxis::setTickLengthOut
