

QCPTextElement::deselect
Event

QCPTextElement::selectEvent

QCPTextElement::setSelected

```
graph LR; A[QCPTextElement::deselectEvent] --> C[QCPTextElement::setSelected]; B[QCPTextElement::selectEvent] --> C;
```

The diagram illustrates a relationship between three methods of the QCPTextElement class. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'QCPTextElement::deselectEvent' and the bottom box contains 'QCPTextElement::selectEvent'. On the right, a gray rectangular box contains the text 'QCPTextElement::setSelected'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'deselectEvent' and 'selectEvent' methods call or trigger the 'setSelected' method.
