

QCPGrid::QCPGrid

```
graph LR; A[QCPGrid::QCPGrid] --> B[QCPGrid::setAntialiasedZeroLine]
```

The diagram illustrates a function call within a C++ class. On the left, a white rectangular box with a black border contains the text 'QCPGrid::QCPGrid', representing the constructor of the QCPGrid class. A blue arrow points from this box to a gray rectangular box on the right, which contains the text 'QCPGrid::setAntialiasedZeroLine', representing a static member function of the same class. This indicates that the constructor calls this function to initialize the zero line with antialiasing.

QCPGrid::setAntialiasedZeroLine
