

QCPAxis::calculateMargin

QCPAxis::draw

QCPAxis::getLabelFont

```
graph LR; A[QCPAxis::calculateMargin] --> C[QCPAxis::getLabelFont]; B[QCPAxis::draw] --> C;
```

The diagram illustrates a dependency or call relationship. Two methods, `QCPAxis::calculateMargin` and `QCPAxis::draw`, are shown on the left. Both have blue arrows pointing to a third method, `QCPAxis::getLabelFont`, which is highlighted in a gray box on the right. This indicates that both `calculateMargin` and `draw` rely on the `getLabelFont` method.
