

QCPAxis::setSubTickLength

```
graph LR; A[QCPAxis::setSubTickLength] --> B[QCPAxis::setSubTickLengthIn]; A --> C[QCPAxis::setSubTickLengthOut];
```

The diagram illustrates a method branching in the QCP library. A central box on the left, labeled 'QCPAxis::setSubTickLength', has two blue arrows pointing to the right. The top arrow points to a box labeled 'QCPAxis::setSubTickLengthIn', and the bottom arrow points to a box labeled 'QCPAxis::setSubTickLengthOut'. The central box has a gray background, while the two destination boxes have white backgrounds.

QCPAxis::setSubTickLengthIn
