

QCPCColorScale::rescaleData  
Range

QCPCColorMap::setColorScale

QCPCColorMap::colorScale

```
graph LR; A[QCPCColorScale::rescaleData Range] --> C[QCPCColorMap::colorScale]; B[QCPCColorMap::setColorScale] --> C;
```

The diagram illustrates a relationship between two source functions and a target property. On the left, two white rectangular boxes with black borders contain the text 'QCPCColorScale::rescaleData Range' and 'QCPCColorMap::setColorScale'. On the right, a gray rectangular box with a black border contains the text 'QCPCColorMap::colorScale'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both functions are used to set or update the 'colorScale' property.
