

QCPCColorScale::setGradient

```
graph LR; A[QCPCColorScale::setGradient] --> B[QCPCColorScale::gradient]; A --> C[QCPCColorScale::gradientChanged];
```

A diagram illustrating the relationship between three QCPCColorScale methods. A central box on the left, labeled 'QCPCColorScale::setGradient', has two blue arrows pointing to two boxes on the right. The top box is labeled 'QCPCColorScale::gradient' and the bottom box is labeled 'QCPCColorScale::gradientChanged'.
