

QCPBars::moveAbove

QCPBars::moveBelow

QCPBars::~~QCPBars

QCPBars::connectBars

```
graph LR; A[QCPBars::moveAbove] --> D[QCPBars::connectBars]; B[QCPBars::moveBelow] --> D; C[QCPBars::~~QCPBars] --> D;
```

The diagram illustrates a dependency or relationship between four methods of the QCPBars class. On the left, three white rectangular boxes are stacked vertically, each containing a method name: 'QCPBars::moveAbove' at the top, 'QCPBars::moveBelow' in the middle, and 'QCPBars::~~QCPBars' at the bottom. On the right, a single gray rectangular box contains the method name 'QCPBars::connectBars'. Three blue arrows originate from the right side of the three white boxes and point towards the left side of the gray box, indicating that the three methods on the left are associated with or depend on the 'connectBars' method.
